Prices shown are estimates of Mercury Diamond for wholesale cash prices. When traded in the wholesale market, variations on this price can also be found. Wholesale prices are those traded between polishers and traders, with slight markups as they change hands. Moving further downstream in the value chain, markups rise to reflect increasing value-add.

\* Transactions of diamonds between 0.01-0.17 carats are usually in the form of parcels that are subject to individual sorting practices. The proportion of price points that are based on transactions versus those based on other market data cannot be specified for this list category.

Prices shown are estimates of Mercury Diamond for wholesale cash prices. When traded in the wholesale market, variations on this price can also be found. Wholesale prices are those traded between polishers and traders, with slight markups as they change hands. Moving further downstream in the value chain, markups rise to reflect increasing value-add.

Prices shown are estimates of Mercury Diamond for wholesale cash prices. When traded in the wholesale market, variations on this price can also be found. Wholesale prices are those traded between polishers and traders, with slight markups as they change hands. Moving further downstream in the value chain, markups rise to reflect increasing value-add.

Prices shown are estimates of Mercury Diamond for wholesale cash prices. When traded in the wholesale market, variations on this price can also be found. Wholesale prices are those traded between polishers and traders, with slight markups as they change hands. Moving further downstream in the value chain, markups rise to reflect increasing value-add.
